SUMMARY

- 3.5 years of building scalable distributed systems and full-stack applications using Node.js, React, Angular, and AWS
- Architected platforms serving 500+ concurrent users processing 10K+ daily operations with 99.9% uptime and real-time capabilities
- Expert in microservices architecture, system design (HLD/LLD), performance optimization (93% latency reduction), and leading technical teams

SKILLS

Node.js (NestJS, Express) • Python • REST APIs • WebSocket • Kafka • BullMQ • OAuth • JWT • RBAC
Angular • React • Next.js • TypeScript • Redux • RxJS • PostgreSQL • MySQL • MongoDB • Redis
Query Optimization • AWS (EC2, S3, Lambda) • Docker • CI/CD • Nginx • OpenAI • Claude AI
LangChain • LangGraph • RAG • Microservices • Distributed Systems • HLD/LLD • SOLID Principles
DDD • Prometheus • Grafana • Loki • Agile • TDD • Git • Github

PROFESSIONAL EXPERIENCE

Full Stack Engineer | Petco (USA · California Based)

Remote, India

May 2026 - Present

- Building and maintaining full-stack features for Petco's e-commerce platform using TypeScript, React, Next.js, and Python (FastAPI/Django) with PostgreSQL, GraphQL, and REST APIs. Architecting serverless solutions on AWS Lambda, S3, API Gateway, and SQS/SNS while handling real-time data streaming via Apache Kafka..
- Contributing to CI/CD pipelines, Docker-based deployments, and Agile sprints in collaboration with US-based teams. Ensuring ARIA accessibility compliance and maintaining test coverage with React Testing Library and Pytest.

Software Developer | Bonami Software Pvt Ltd

Noida, India

March 2026 – May 2026

- Worked on healthcare/medical domain projects with a focus on resolving production issues and improving application stability. Was on Bench — collaborating with internal teams and actively participating in client interviews and onboarding processes.

Software Engineer | Digital Navigation Pvt Ltd

Noida, India

Mar 2023 – March 2026

- Built distributed data platform using Node.js microservices, Kafka, and PostgreSQL serving 500+ users with 10K+ daily operations and 99.9% uptime
- Reduced database query latency by 93% (from 3s to 200ms) through PostgreSQL indexing, Redis caching, and async job processing with BullMQ
- Engineered real-time WebSocket collaboration system with Redis pub/sub handling 100+ concurrent users, reducing operational cycles by 40%
- Developed full-stack applications using Angular, React, and Node.js with JWT authentication, RBAC, and API rate limiting (1000 req/min)
- Improved application performance by 75% (page load from 8s to 2s) via code splitting, lazy loading, and virtual scrolling for large datasets
- Managed AWS infrastructure (EC2, S3, Lambda) with Docker and GitHub Actions CI/CD achieving zero-downtime deployments
- Established monitoring with Prometheus, Grafana, and Loki reducing incident response time by 50%

- Led team of 3-5 engineers, reduced production bugs by 60% through code reviews, Git workflows, and agile practices
- Integrated AI capabilities using OpenAI, Claude AI, and LangChain for OCR, automation, and conversational workflows processing 1000+ docs/day

Web Developer | Arudan Technology Pvt Ltd

Prayagraj, India

Jan 2021 - Jul 2021

- Developed Service Management System with ticketing, tracking, and dashboards using PHP, MySQL, and JavaScript, improving efficiency by 30%

EDUCATION

Master of Computer Application (MCA)

Abdul Kalam Technical University (AKTU) , Lucknow, Uttar Pradesh, India

2021 - 2023

Bachelor of Computer Application (BCA)

Mahatma Gandhi Kashi Vidyapith University (MGKVP), Uttar Pradesh, India

2018 - 2021

KEY PROJECTS

Layout365 - Enterprise Media Platform | Digital Navigation

- Comprehensive print media platform unifying editorial, advertising, and publishing operations with Angular, Node.js, PostgreSQL
- Optimized performance: 60% bundle size reduction via lazy loading, virtual scrolling for 10,000+ row tables, page load time reduced from 8s to 2s
- Built data visualization and analytics enabling organization-wide self-service data exploration and insights

LeadNirvana – AI Sales Automation Platform | Personal

- AI-powered B2B sales execution engine automating lead qualification, follow-ups, and escalation using NestJS, PostgreSQL/MySQL, Redis, BullMQ, and OpenAI/Claude
- Built real-time multi-channel system (WhatsApp, Instagram/Facebook, Email) with WebSockets, lead scoring, and unified omnichannel inbox
- Improved conversion efficiency for high-ticket businesses through autonomous AI workflows and ad-to-revenue attribution
